Activate ProRealTime

Launch ProRealTime

ProfitAlgos – Installation & Start Guide (ProRealTime)

1. Open a New Chart

Start by opening a new chart in ProRealTime.

2. Select the Correct Instrument

<mark>**First of all: Delete all files you might have from ProfitAlgos since before in ProRealtime.**</mark>

Choose the correct indice (e.g. DAX, Nasdaq, Wall Street).

PA-**DAX**…= **Germany 40 Cash (1€)**
PA-**NAS**.. = **UsTech 100 Cash (1€)**
PA-**WS**… = **Wall Street Cash (1€)**

3. Select the Correct Timeframe

Then choose the correct timeframe (e.g. 15 min, 30 min).

PA-XXX **30M**… = **Timeframe 30 minutes.**
PA-XXX **15M**… = **Timeframe 15 minutes.**
PA-XXX **10M**… = **Timeframe 10 minutes.**
PA-XXX **5M**… = **Timeframe 5 minutes.**
PA-XXX **3M**… = **Timeframe 3 minutes.**

4. Import the Strategy Files

Click on Indicators in the chart.

Press Import and import the following files in order:
1. PaKey.itf
2. PA-XXX.itf (the strategy file)
3. PA-XXX – IND.itf (the indicator file)

4. Activate Backtest Mode

Go to the Backtesting and Automatic Trading tab.
Choose the algo: PA-XXX
Click Modify

5. Set Your Position Size

Adjust the position size according to your preference.
- Use decimal points (.) – do not use commas (,).
- Minimum size:
 - DAX & Nasdaq: 0.5
 - Wall Street: 0.2
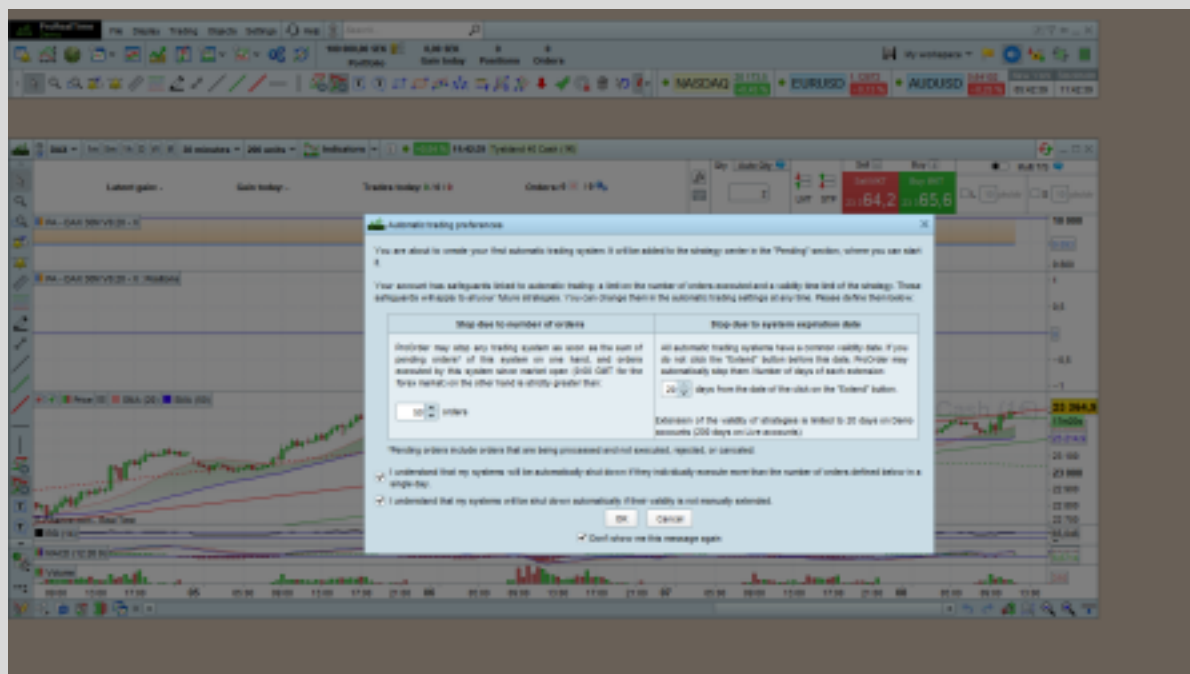

6. Enable Automatic Trading

Switch to the Automatic Trading tab.
Press Prepare for automatic trading
Accept and press OK

Accept and press OK
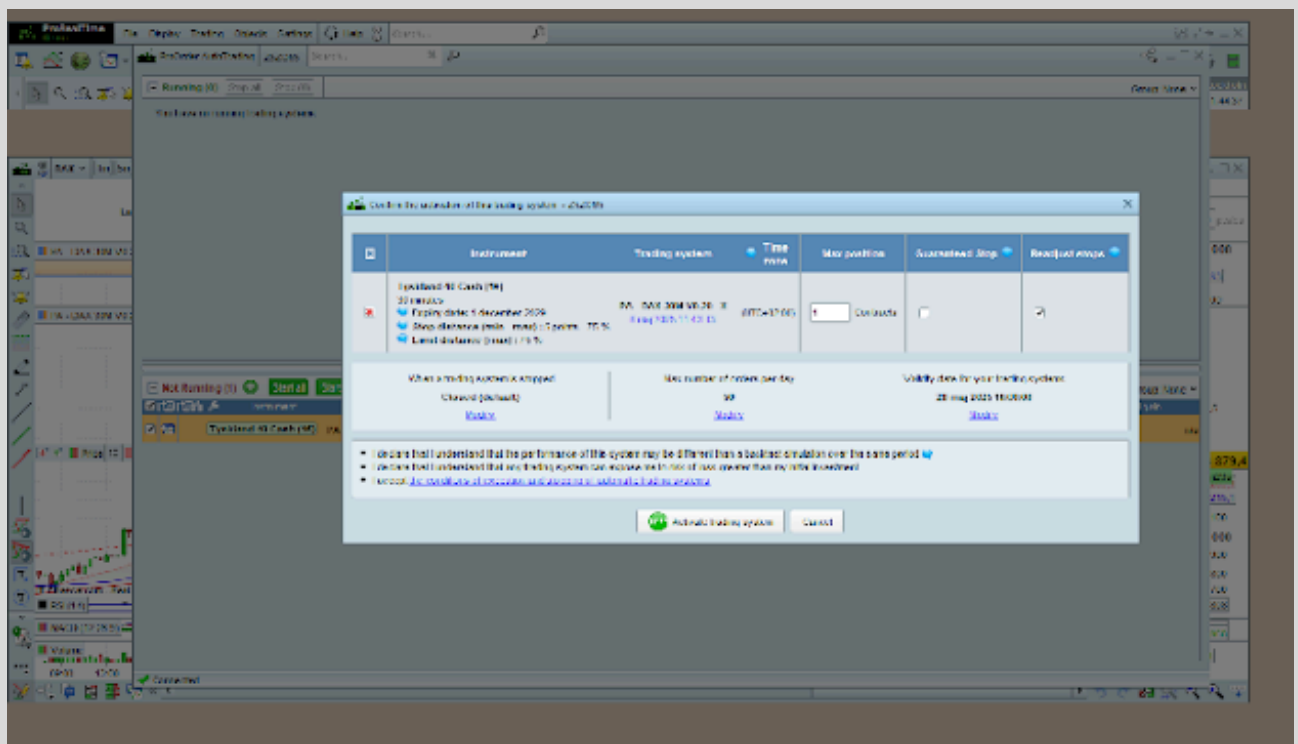

7. Start the Algo

Select your algo from the list.
Press Start
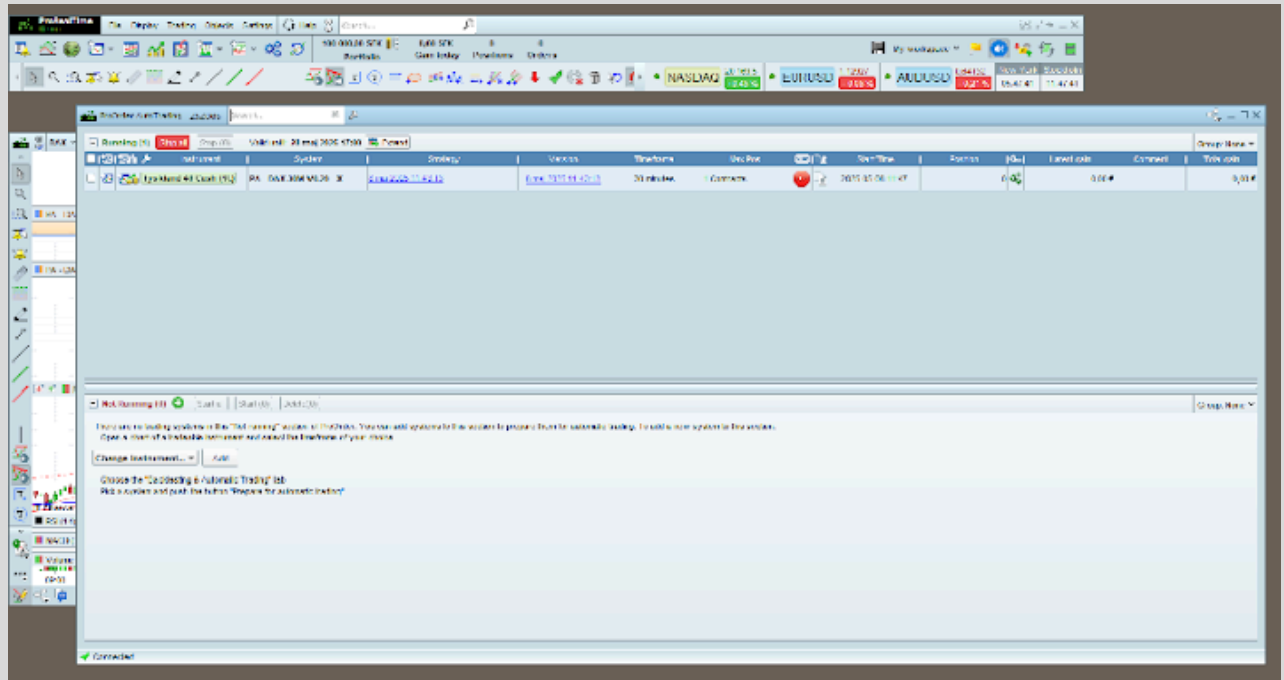

8. Final Checklist (Before Launch)

Make sure the following settings are correct:
- ☑ Readjust stops is enabled
- ☑ Correct instrument is selected
- ☑ Correct timeframe is applied
- ☑ Timezone is set to: UTC +02:00
- ☑ Max position:
 - If size in code is ≤ 1: Max position = 1
 - If size in code is > 1 and ≤ 2: Max position = 2

All Set!

Your algo is now live and trading automatically. You're up and running!
